

“Why Getting Trained?”

Landing a job in this tough economy is no easy feat—especially for college students and recent grads. They often spend weeks scouring online job boards, polishing cover letters and blasting out résumés to no avail.

Not only can job-seeking students and college graduates land full-time jobs through internships—but they also get a chance to test-drive a career before committing. “Meanwhile, employers get the opportunity to find the talent they need to help grow their business without relying on just a short interview,” Lander says. “Entry level employees are the future of a company and so in many ways the most important recruiting decisions an employer can make.”

“The most important factor employers look at when deciding who to hire is interview performance because they want to make sure that the student will be a good fit for their organization,” Lander says.

Job training empowers people to realize their dreams and improve their lives.

Internship Program from Amplus

Experience is important and it necessarily means they need to have previous internship or work experience. "The employer will look at what the student has been learning at school, relevant projects, course work and extracurricular activities. In a highly competitive job environment employers want to see that a candidate has the hunger to be successful more than purely in an academic setting."

AMPLUS, makes the young perusing graduates ready to the job market, training them in all the fields required to start up their career.
